50-773 Chip Deflector/Silencer

50-773 Chip Deflector/Silencer

Introducing the New 50-773 Chip Deflector/Silencer for Pro-Cut Lathes. Designed specifically for the 50-12xx series cutting heads (1200, 1250, 1280 and 1299), this deflector will also work on 50-220 and 50-238 cutting heads as well.

Features that make this deflector unique are:

- Shortened HD wire hoop that fits completely within the footprint of the cutting head
- Wire entering at the rear of the block to control rotation and guarantees firm engagement with the rotor
- Blocks are contoured to allow the deflector to get as close to the rotor hat as possible and to ride securely over the cutting tip screw
- Our thickest blocks available offer increased vibration dampening
- Single HD spring keeps pressure over the cutting tips for best fit and increased vibration dampening.

Contact the Pro-Cut Service Department at 800.543.6618, Prompt #2, with any questions.

PRO-CUT INTERNATIONAL is the world leader in rotor matching systems and on-car brake lathes. The company is located in West Lebanon, NH.
