● **50-360 LOW-BOY TROLLEY**

▲ Pro-Cut's PFM 9.2SL with Low-Boy Trolley machining a F-550 SuperDuty truck.

▲ Pro-Cut's Low-Boy Trolley features a new carriage design, Disc-Lock anti-rotation device, and two "Y" post adapter hangers.

Pro-Cut's new **Low-Boy Trolley (50-360)** makes machining larger trucks and RVs easy and efficient using only a floor jack and jack stand. The usable working range of 18"–26" coincides with most heavy-duty floor jacks used in today's professional shops.

The Low-Boy Trolley features a vertical carriage design that glides up and down on smooth, roller-blade-style wheels. The trolley also employs the new Disc-Lock anti-rotation control device that has proven so effective on Pro-Cut's other new trolley models. There are two "Y" post adapter hangers to hold your choice of up to four adapters.

If you've ever struggled with removing the large rotors from a F550 dual-wheel truck or the like to machine on a bench lathe, you'll appreciate how fast and easy match machining is with a Pro-Cut lathe and Low-Boy Trolley.

The Low-Boy accepts any of the Pro-Cut lathes in the field sold since 1996.
